The Integrity Dividend Harvest Fund is a focused, equity only income fund that seeks low beta (volatility) companies that raise their dividend year over year. In fact, the average company in the portfolio has raised its dividend 30 consecutive years. Since its inception, the fund has raised its per share payout by an average of **5.07% year over year***. So what does this mean? A good dividend paying fund today, and potentially a better dividend paying fund tomorrow that can stay ahead of inflation!

The Dividend Harvest Fund can be your equity foundation for retirement income. Why sell shares to fund retirement when you can let those shares pay you! Not only pay you, but give you a raise year after year should the underlying companies within the fund's portfolio continue to raise their dividends. With the days of pensions ending, retirees need to create their own income stream to fund retirement on their terms. Investing in quality, low beta, dividend raising companies might be the perfect fit for your retirement income needs.

Beta is a volatility measure of the percentage price change of the Fund given a one percent change in a representative market index. The Beta value is determined by comparing the weekly price movements of the Fund and the S&P 500 Index over the last two years.

Because the Fund can only distribute what it earns, the Fund's distributions to shareholders could decline when dividend income from stocks in the Fund's portfolio declines. The Fund's emphasis on dividend-paying stocks involves the risk that such stocks may fall out of favor with investors and underperform the market. Also, a company may reduce or eliminate its dividend, which could affect the Fund's ability to generate income.

Preferred stocks are subject to the risks associated with other types of equity securities, such as potential volatility, as well as additional risks, such as risks related to deferral and omission of distributions; credit and subordination risk; interest rate risk; call, reinvestment and income risk; liquidity risk; risks related to limited voting rights; and risks related to special redemption rights.
