Morningstar Ratings™ Risk Rating - Low

IDIVX ★★☆☆

**Morningstar Rating™ is for the period ended October 31, 2018. The Fund's 4-star overall Morningstar Rating™ measures risk-adjusted returns and is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar ratings metric. The Fund (IDIVX) received 3 stars for the 3-year period and 4 stars for the 5-year period. The Fund's 10-year rating is not available due to an inception date of 5/1/2012. Number of funds in the Large Value category are 1089 and 932 respectively.

Annualized Distribution Rate

	Class A	Class C	Class I
NAV	2.83%	2.09%	3.09%
MOP	2.69%	N/A	N/A

30-Day SEC Yield

	Class A	Class C	Class I
Subsidized	2.535%	1.916%	2.921%
Unsubsidized	1.949%	1.302%	2.303%

The SEC Yield reflects the rate at which the Fund is earning income on its current portfolio of securities while the Distribution Rate reflects the Fund's dividends paid to shareholders in the prior quarter. Accordingly, the Fund's SEC Yield and Distribution Rate may differ. Rate and Yield are as of September 30, 2018.

Beta

Beta: 0.73

Beta is a volatility measure of the percentage price change of the Fund given a one percent change in a representative market index. The Beta value is determined by comparing the weekly price movements of the Fund and the S&P 500 Index over the last two years.

The performance data represents past performance, which does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Returns are for the period ended September 30, 2018 and reflect the deduction of the maximum sales load of 5.00%. Current performance may be lower or higher than the performance data quoted. To obtain performance data current to the most recent month-end, an investor may call toll free (800) 276-1262 or visit www.integrityvikingfunds.com.

This Fund Fact Sheet must be accompanied or preceded by a current prospectus. The Fund is sold by prospectus only. For more complete information an investor should consider the investment objectives, risks, and charges and expenses of the Fund carefully before investing. The prospectus contains this and other information about the Fund. You may obtain a prospectus at no cost from your financial advisor or at www.integrityvikingfunds.com. Please read the prospectus carefully before investing.

Because the Fund can only distribute what it earns, the Fund's distributions to shareholders could decline when dividend income from stocks in the Fund's portfolio declines. The Fund's emphasis on dividend-paying stocks involves the risk that such stocks may fall out of favor with investors and underperform the market. Also, a company may reduce or eliminate its dividend, which could affect the Fund's ability to generate income.

Preferred stocks are subject to the risks associated with other types of equity securities, such as potential volatility, as well as additional risks, such as risks related to deferral and omission of distributions; credit and subordination risk; interest rate risk; call, reinvestment and income risk; liquidity risk; risks related to limited voting rights; and risks related to special redemption rights.

The Fund may invest in securities of non-U.S. issuers, which have special risks. These risks include international economic and political developments, foreign government actions including restrictions on payments to non-domestic persons such as the Fund, less regulation, less information, currency fluctuations, and interruptions in currency flow. Investments in foreign securities also entail higher costs.

A fee level is designated as Below Average because it ranks in the second cheapest quintile when compared to its fee level comparison group, which consists of other funds' similar share classes that invest in a similar asset class and have similar expense structures. IDIVX is in the Large Cap Front Load comparison group.

Morningstar. For each fund with at least a 3-year history, Morningstar calculates a risk-adjusted return measure that accounts for variation in a fund's monthly performance (including the effects of all sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. These ratings change monthly. The top 10% of funds in each category receive a Morningstar Rating™ of 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund and rated separately.) Past performance does not guarantee future results. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information.

In each Morningstar Category, the 10% of funds with the lowest measured risk are described as Low Risk, the next 22.5% Below Average, the middle 35% Average, the next 22.5% Above Average, and the top 10% High.

Risks of Non-Diversification: Because a relatively high percentage of the Fund's assets may be invested in the securities of a limited number of issuers, the Fund's portfolio may be more susceptible to any single economic, technological, or regulatory occurrence than the portfolio of a diversified fund.

S&P 500® Index is a widely recognized, unmanaged index of 500 stock prices chosen for market size, liquidity, and industry group representation. It is a market-value weighted index (stock price times number of shares outstanding), with each stock's weight in the index proportionate to its market value.
