Bond Quality

Sources: The ratings agencies that provided the ratings are Standard & Poor's and Moody's. When ratings vary, the higher rating is used. Credit quality ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest). "NR" is used to classify securities for which a rating is not available. Ratings apply to the holdings in the Fund portfolio and not to the Fund or its shares. Ratings are subject to change.

--	-------	-------

**The Fund's investment adviser has contractually agreed to waive fees and reimburse expenses through November 29, 2018 so that Total Annual Fund Operating Expenses After Fee Waivers and Expense Reimbursements (excluding taxes, brokerage fees, commissions, extraordinary or non-recurring expenses, and acquired fund fees and expenses) do not exceed 0.98% for Class A Shares and 0.73% for Class I Shares of average daily net assets. This expense limitation agreement may only be terminated or modified prior to November 29, 2018 with the approval of the Fund's Board of Trustees.*

Taxable Equivalent Yields

* Total of highest marginal income tax rate of 37% and net investment income tax of 3.8% (commonly referred to as the Medicare Contribution Tax).

The Taxable Equivalent Yields chart shows the estimated yield required from a taxable investment to match the yield from a tax-free investment, i.e. 2.50% = 4.61%. The chart assumes a maximum federal income tax rate* of 40.80% and a state tax rate of 5.00%. It is for illustrative purposes only and is not indicative of past or future performance of the Fund. After-tax returns are calculated using the highest historical individual federal marginal income tax rate and do not reflect the impact of local taxes. The taxable and tax-free yields reflect all applicable charges of the Fund. All returns assume reinvestment of dividends and capital gains. Lower maximum tax rates on capital gains and dividends would reduce the difference between the taxable and tax-free yields shown above.

All or a portion of the Fund's dividends may be subject to state and local taxes, and where applicable, federal alternative minimum tax (AMT). Actual after-tax returns depend on an investor's tax situation and may differ from those shown. You must consider your own personal investment horizon and income tax brackets, both current and anticipated, when making an investment decision. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

**Source: Morningstar. For each fund with at least a 3-year history, Morningstar calculates a risk-adjusted return measure that accounts for variation in a fund's monthly performance (excluding sales charges and including fees and expenses versus all funds in the Morningstar category), placing more emphasis on downward variations and rewarding consistent performance. These ratings change monthly. The top 10% of funds in each category receive a Morningstar Rating™ of 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund and rated separately.) Past performance does not guarantee future results. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. In each Morningstar Category, the 10% of funds with the lowest measured risk are described as Low Risk, the next 22.5% Below Average, the middle 35% Average, the next 22.5% Above Average, and the top 10% High.

Bond prices and, therefore, the value of a bond fund will decline as interest rates rise. Because the Fund invests in securities of a single state, the Fund is more susceptible to factors adversely impacting the respective state securities than a municipal fund that does not concentrate its securities in a single state. All or a portion of the Fund's dividends may be subject to state and local taxes and, where applicable, federal alternative minimum tax (AMT).

Duration calculated according to the modified duration formula. Duration is an indication of a fund's sensitivity to changes in interest rates. Please note, duration numbers will change as market conditions change; therefore duration should not solely be relied upon to indicate a municipal bond fund's potential volatility.

The Fund's use of derivatives, such as futures and options, may expose the Fund to additional risks that it would not be subject to if it invested directly in the securities underlying those derivatives. The more the Fund invests in leveraged instruments, the more the leverage will magnify any gains or losses on those investments. These risks may cause the Fund to experience higher losses and/or volatility than a fund that does not invest in derivatives and/or leverage.

MOP = Max Offering Price

NAV = Net Asset Value
