Additional Fund Statistics Information

Distribution Rate is an annualized rate of dividend distributions for shareholders taking dividends in cash based on actual dividend distributions and actual number of days in the distribution period.

Beta is a volatility measure of the percentage price change of the Fund given a one percent change in a representative market index. The Beta value is determined by comparing the weekly price movements of the Fund and the S&P 500 Index over the last five years.

SEC yield of a fund is a standardized calculation of the fund's yield. This allows investors to compare funds from different issuers. The SEC yield listed is subsidized, which means it reflects income earned during a 30-day period after the deduction of the fund's net expenses. The yield is net of expense waivers and reimbursements.
