Data as of March 31, 2021 unless otherwise noted

MORNINGSTAR SUSTAINABILITY RATING™ :

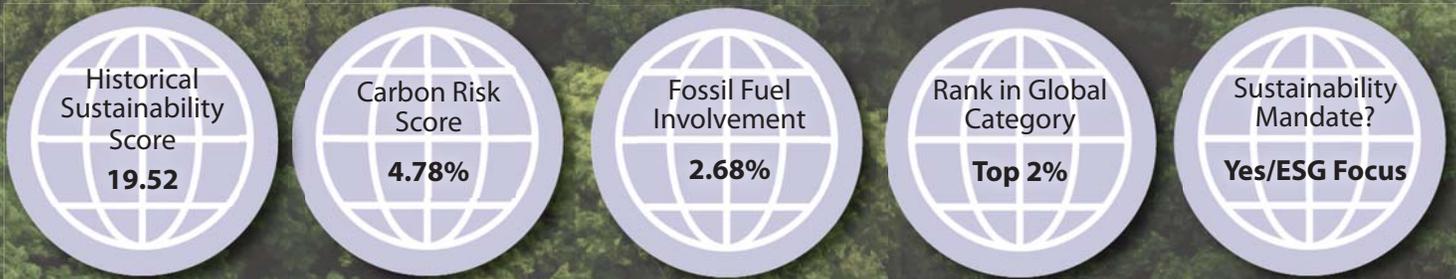

CARBON RATING: LOW

MORNINGSTAR® RATING : ★★★★★

RETURNS: HIGH

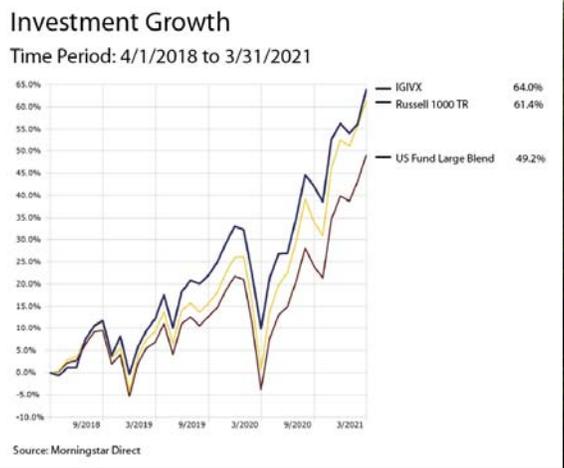

Morningstar Rating™ is for the period ended 3/31/2021 in the Large Blend category. The Fund's 5-star overall Morningstar Rating™ measures risk-adjusted returns and is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar ratings metric. The Fund (IGIVX) received 5 stars for the 3-year period. The 5- and 10-year numbers are not available due to inception date of 8/1/2016. Number of funds in category are 1225.

Integrity ESG Growth & Income Fund is sold by prospectus only. For more complete information an investor should consider the investment objectives, risks, and charges and expenses of the Fund carefully before investing. The prospectus contains this and other information about the Fund. You may obtain a prospectus at no cost from your financial advisor or at www.integrityvikingfunds.com. Please read the prospectus carefully before investing.

The performance data represents past performance, which does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain performance data current to the most recent month-end, an investor may call toll free 800-276-1262 or visit www.integrityvikingfunds.com.

Returns for Integrity ESG Growth & Income Fund for the period ended 3/31/21 are: Class I Shares YTD 5.02%, 1-year 49.27%, 3-year 17.88%, SI 15.81%. Due to Class I Shares inception date of 8/1/2016, 5- and 10-year returns are not available. Total Annual Fund Operating Expenses After Fee Waivers and Expense Reimbursements are 0.99% for Class I Shares. Total Annual Fund Operating Expenses Gross of Fee Waivers and Expense Reimbursements are 1.62% for Class I Shares.

The Morningstar™ Sustainability Rating is a measure of how well the holdings in a portfolio are managing their environmental, social, and governance, or ESG, risks and opportunities relative to their Morningstar Category peers. The rating is a holdings-based calculation using company-level ESG analytics from Sustainalytics, a leading provider of ESG research. It is calculated for managed products and indexes globally using Morningstar's portfolio holdings database. The Morningstar Sustainability Rating is derived from the Morningstar® Portfolio Sustainability Score™, which is calculated based on company-level ESG scores and company involvement in ESG-related controversies. Sustainalytics provides ESG scores on more than 4,500 companies globally, which are evaluated within global industry peer groups. In addition, Sustainalytics tracks and categorizes ESG-related controversial incidents on more than 10,000 companies globally. More information regarding Sustainability calculations can be found at www.morningstar.com. Sustainability Rating & Score are as of 1/31/2021.

Morningstar carbon metrics are asset-weighted portfolio calculations based on Sustainalytics company carbon-risk research. Based on two of these metrics—Carbon Risk Score and Fossil Fuel Involvement %—funds may receive the Low Carbon designation, which allows investors to easily identify low-carbon funds within the global universe.

To receive the Low Carbon designation, a fund must have a 12-month average Portfolio Carbon Risk Score below 10 and a 12-month average Fossil Fuel Involvement % of less than 7% of assets. For these metrics to be calculated, at least 67% of a portfolio's assets must be covered by Sustainalytics company carbon-risk research. All Morningstar carbon metrics are calculated quarterly.

Morningstar Rating: For each fund with at least a 3-year history, Morningstar calculates a risk-adjusted return measure that accounts for variation in a fund's monthly performance (excluding sales charges and including fees and expenses versus all funds in the Morningstar category), placing more emphasis on downward variations and rewarding consistent performance. These ratings change monthly. The top 10% of funds in each category receive a Morningstar Rating™ of 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund and rated separately.) Past performance does not guarantee future results. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. In each Morningstar Category, the 10% of funds with the lowest measured risk are described as Low Risk, the next 22.5% Below Average, the middle 35% Average, the next 22.5% Above Average, and the top 10% High. Morningstar provides adjusted historical returns and an Extended Performance Rating for some mutual funds in its universe. This means any share class that doesn't have a 1-, 3-, 5-, or 10-year performance history may receive a hypothetical Morningstar Rating based on the oldest surviving share class of the fund. First, Morningstar computes the funds' new return stream by appending an adjusted return history of the oldest share class. Next, the Extended Performance Rating is determined by comparing the adjusted-historical returns to the current open-end mutual fund universe to identify placement in the bell curve used to assign the Morningstar Rating.

SUSTAINABILITY STATS: Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score. Sustainability Mandate information is derived from the fund prospectus. Carbon metrics as of 3/31/2020. Category: Large Blend. Data is based on long positions only. Fossil Fuel Involvement % is the portfolio's asset-weighted percentage exposure to fossil fuels, averaged over the trailing 12 months. Companies with fossil fuel involvement are defined as those in the following subindustries: Thermal Coal Extraction, Thermal Coal Power Generation, Oil & Gas Production, Oil & Gas Power Generation, and Oil and Gas Products and Services. Fossil Fuel Involvement % is the portfolio's asset-weighted percentage exposure to fossil fuels, averaged over the trailing 12 months. Companies with fossil fuel involvement are defined as those in the following subindustries: Thermal Coal Extraction, Thermal Coal Power Generation, Oil & Gas Production, Oil & Gas Power Generation, and Oil and Gas Products and Services.

BUILT FOR RETURN definitions: 3-Year data. Alpha measures the difference between a fund's expected returns based on its beta and its actual returns. A positive alpha indicates the fund has performed better than its beta would predict. A negative alpha indicates a fund has underperformed, given the fund's beta. Beta measures a fund's sensitivity to market movements. A beta greater than one indicates the investment is more volatile than the market. If beta is less than one, the investment is less risky than the market. Standard Deviation measures the range of a fund's performance. The greater the standard deviation, the greater the fund's volatility. Upside Capture Ratio measures a manager's performance in up-markets relative to the index. A value over 100 indicates that a fund has outperformed the benchmark during periods of positive returns for the benchmark. Downside Capture Ratio measures the manager's performance in down-markets relative to the index. A value of less than 100 indicates that a fund has lost less than its benchmark when the benchmark has been in the red.
