The Portfolio Management Team is jointly and primarily responsible for the day-to-day management of the Fund. The Team consists of Shannon Radke, Monte Avery, Mike Morey, and Trey Welstad, CFA, whose combined investment industry experience totals over 60 years.

A support staff of research analysts assist the Portfolio Management Team.

## Fund Overview

Integrity Energized Dividend Fund seeks to provide your clients an opportunity to invest in the income side of the energy sector. The Fund will primarily invest in dividend-paying equity securities within several energy related industries, including certain utilities and materials companies.

The Fund seeks long-term appreciation while providing high current income by investing at least 80% of its net assets in dividend paying equity securities. Furthermore, the Fund will invest at least 65% of its net assets in companies with business operations in or related to energy industries.

## Energy Sector Industries

Energy Sector Industries include, but are not limited to:

- Exploration & Production
- Energy Services
- Energy Equipment
- Pipelines
- Refineries

## Investment Objective and Selection Process

The investment objective of the Fund is to provide long-term capital appreciation while providing high current income.

The Portfolio Management Team emphasizes dividend yield in selecting stocks for the Fund because the Team believes, over time, dividend income can contribute significantly to total return and is a more consistent source of investment return than capital appreciation.

The Team considers a number of U.S. and global economic factors as well as its outlook for commodity prices in its determination of the relative attractiveness of the various energy related industries.

Company selection factors include, but are not limited to:

- Dividend Yield
- Dividend Growth Rate
- Earnings Growth
- Price-to-earnings (P/E) Multiples
- Balance Sheet Strength

## Favorable Tax Treatment of Dividend Income

Qualified stock dividends for most individuals are taxed at 15%. However, the maximum rate for higher income investors is 20%\* (at 0% for investors in the 10% or 15% tax brackets) making equity dividends more attractive than bond income (which is taxed at an investor's marginal tax rate) for tax purposes.

\*Higher income investors are defined as singles with taxable income above \$400,000, married joint-filing couples with income above \$450,000, heads of households with income above \$425,000, and married individuals who file separate returns with income above \$225,000. Also, Higher income investors can get taxed with the 3.8% Medicare surtax on investment income, which can result in a maximum 23.8% federal tax rate on dividends. The tax information contained herein is general in nature and not intended to constitute tax advice. Integrity Viking Funds does not provide tax or legal advice. Prospective investors should consult with a tax or legal advisor before making any investment decision.

## Generate Income in a Low Yield Environment

Interest rates are at or near historical lows. Many investors are faced with inadequate savings to fund their retirement. U.S. Treasury securities, money market fund and CDs may lack sufficient yield to meet their future needs. For some investors, dividend-paying stocks can serve as a complement to fixed income securities in order to provide a steady source of income in their retirement years. Plus, if you don't need the income stream today, you can reinvest the dividends. This can help you accumulate more shares so you can have that income stream when you need it.

*Past performance is no guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Diversification does not assure a profit or protect against loss in a declining market.*

*Because the Fund normally invests in common stocks of companies engaged in natural resources-related activities in a limited geographical area, the Fund's performance largely depends on the overall economic condition of the related sectors and geographical area. Additionally, diplomatic, political or economic developments in foreign countries could adversely impact the Fund's investment in securities of foreign companies.*
