Bond Quality

Sources: The ratings agencies that provided the ratings are Standard & Poor's and Moody's. When ratings vary, the higher rating is used. Credit quality ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest). "NR" is used to classify securities for which a rating is not available. Ratings apply to the holdings in the Fund portfolio and not to the Fund or its shares. Ratings are subject to change.

[1]**Net Annual Fund Operating Expenses** after Fee Waivers & Expense Reimbursements (excluding taxes, brokerage fees, commissions, extraordinary and non-recurring expenses, and acquired fund fees & expenses)	**0.98%**	**0.73%**

[1]The Fund's investment adviser has contractually agreed to waive fees and reimburse expenses through November 29, 2026 so that Total Annual Fund Operating Expenses After Fee Waivers and Expense Reimbursements (excluding taxes, brokerage fees, commissions, extraordinary or non-recurring expenses, and acquired fund fees and expenses) do not exceed 0.98% for Class A Shares and 0.73% for Class I Shares of average daily net assets. This expense limitation agreement may only be terminated or modified prior to November 29, 2026 with the approval of the Fund's Board of Trustees.

Taxable Equivalent Yields

* Total of highest marginal income tax rate of 37% and net investment income tax of 3.8% (commonly referred to as the Medicare Contribution Tax).

The Taxable Equivalent Yields chart shows the estimated yield required from a taxable investment to match the yield from a tax-free investment, i.e. 2.50% = 4.67%. The chart assumes a maximum federal income tax rate* of 40.80% and a state tax rate of 5.58%. It is for illustrative purposes only and is not indicative of past or future performance of the Fund. After-tax returns are calculated using the highest individual federal marginal income tax rate and do not reflect the impact of local taxes. The taxable and tax-free yields reflect all applicable charges of the Fund. All returns assume reinvestment of dividends and capital gains. Lower maximum tax rates on capital gains and dividends would reduce the difference between the taxable and tax-free yields shown above.

All or a portion of the Fund's dividends may be subject to state and local taxes, and where applicable, federal alternative minimum tax (AMT). Actual after-tax returns depend on an investor's tax situation and may differ from those shown. You must consider your own personal investment horizon and income tax brackets, both current and anticipated, when making an investment decision. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

Please read the prospectus carefully before investing.

Bond prices and, therefore, the value of a bond fund will decline as interest rates rise. Because the Fund invests in securities of a single state, the Fund is more susceptible to factors adversely impacting the respective state securities than a municipal fund that does not concentrate its securities in a single state. All or a portion of the Fund's dividends may be subject to state and local taxes and, where applicable, federal alternative minimum tax (AMT).

The Fund's use of derivatives, such as futures and options, may expose the Fund to additional risks that it would not be subject to if it invested directly in the securities underlying those derivatives. The more the Fund invests in leveraged instruments, the more the leverage will magnify any gains or losses on those investments. These risks may cause the Fund to experience higher losses and/or volatility than a fund that does not invest in derivatives and/or leverage.

Duration calculated according to the modified duration formula. Duration is an indication of a fund's sensitivity to changes in interest rates. Please note, duration numbers will change as market conditions change; therefore duration should not solely be relied upon to indicate a municipal bond fund's potential volatility.

Distribution Rate is an annualized rate of dividend distributions for shareholders taking dividends in cash based on actual dividend distributions and actual number of days in the distribution period.

Effective Rate is an annualized rate of dividend distributions for shareholders reinvesting dividends based on actual dividend distributions and actual number of days in the distribution period.
